Thank you for purchasing Realtor.

You're one step closer to your next great project! If you get lost between layers and keyframes, drop us a line at hello@kainxtheory.com. We'll do our very best to help you.

Don't forget to write a short testimonial on your experience with Realtor, and follow us on Videohive so you never miss new exciting items.

Questions regarding the Teaser version:

How do I replace the logo (common for both versions)?

1. Open the *Logo Source* composition
2. Go to File > Import > File (Ctrl/Cmd + I), locate the file you want to import and click Open
3. Drag the file from the Project Window to the *Logo Source* composition
4. Scale the new layer so that it's approximately the size of the previous logo
5. Hide the previous logo

Note: The logo is common for both versions of Realtor (Reasons and Teaser).

How do I resize the logo?

1. Open the *Teaser Packshot Logo* composition (Project Window > Shortcuts > Photo Shortcuts > Packshot Logo).
2. Select the *Logo Source* layer.
3. Press S on your keyboard, and scale accordingly.

How do I edit the bars info in the intro?

1. Open the *Teaser Intro* composition (Project Window > Shortcuts > Text Shortcuts > Teaser Intro)
2. In the Timeline Window, double click on the bar you want to edit

3. Double click on the text layer

4. After editing the text, hit Cmd/Ctrl + Enter to apply changes.

If the text is longer than the composition size, you'll need to do a couple things more:

1. Press Cmd/Ctrl + K to open the Composition Settings.

2. Set the composition width accordingly.

3. Select the *Background* layer, then press Cmd/Ctrl + F and look for 'Size'

4. Change the first value (width) so that it matches the composition's width.

5. Select the Mask layer and press Cdd/Ctrl + Shift + Y.

6. In the Solid Settings Window, click on Make Comp Size, and close the window.

How do I replace the house photos?

1. Go to File > Import > File (Ctrl/Cmd + I), locate the images you want to use and click Open.

2. Navigate to Project Window > Shortcuts > Photo Shortcuts > House Photos.

3. Open the House Photo source composition you want to edit.

4. Drag any of the media you've imported in the composition.

5. Scale each image so that it fits the entire frame (use high resolution images for better results).

How do I reposition the house photos?

1. Open the *House Photo* composition you want to edit (Project Window>
   Shortcuts > Photo Shortcuts > House Photos).
2. Select the *House Photo Source* composition.
3. Press P on your keyboard,then drag it around to reposition.

How do I edit the texts over the house photos?

1. Open the *House Photo* composition you want to edit (Project Window>
   Shortcuts > Photo Shortcuts > House Photos).
2. Double click on any of the text layers you want to edit.
3. After editing the text, hit Cmd/Ctrl + Enter to apply changes.

How do I hide the texts over the house photos?

1. Open the *House Photo* composition you want to edit (Project Window>
   Shortcuts > Photo Shortcuts > House Photos).
2. In the Timeline Window, press the Shy Toggle to show all layers.
3. Hide the layers labeled *Typography Blur*.
4. Press the Shy Toggle again to hide all shy layers.

How do I reposition the texts over the house photos?

1. Open the *House Photo* composition you want to edit (Project Window>
   Shortcuts > Photo Shortcuts > House Photos).
2. Select the text layer you want to modify.
3. Press P on your keyboard,then drag it around to reposition.

How do I edit the info in the Details scene?

1. Open the *Teaser All Details* composition (Project Window > Shortcuts > Text Shortcuts)
2. In the Timeline Window, double click on the details set you want to edit.
3. Double click on any text layer.
4. After editing the text, hit Cmd/Ctrl + Enter to apply changes.

Note: There are some optional lines in case you want to display more details in a given details set.

How do I edit the texts in the Features scene?

1. Open the *Teaser Feature Typography* composition you want to edit (Project Window > Shortcuts > Text Shortcuts)
2. In the Timeline Window, double click on the text layer you want to edit.
3. After editing the text, hit Cmd/Ctrl + Enter to apply changes.

How do I replace the floor plan image?

1. Go to File > Import > File (Ctrl/Cmd + I), locate the image you want to use and click Open.
2. Navigate to Project Window > Shortcuts > Photo Shortcuts > Floor Plan.
3. Open the *Floor Plan Source* composition.
4. Drag the floor plan you've imported in the composition.

5.   Scale the image so that it's almost the size of the previous floor plan.
6.   Hide the previous floor plan.

What if I don't have a floor plan of the house?

If you don't happen to have a floor plan of the house, you can just use a simple image instead. To do that:

1.   Go to File > Import > File (Ctrl/Cmd + I),locate the image you want to use and click Open.
2.   Navigate to Project Window > Shortcuts > Photo Shortcuts > Floor Plan.
3.   Open the *Floor Plan Alternative Source* composition.
4.   Drag the image you've imported in the composition.
5.   Scale the image so that it fits the entire frame.
6.   Press Shift (or Tab if you're using a newer version of After Effects) and navigate back to the *Floor Plan* composition.
7.   Hide the *Floor Plan Source* layer and unhide the *Floor Plan Alternative Source* layer.

How do I replace the paint brush stroke image?

1.   Go to File > Import > File (Ctrl/Cmd + I),locate the image you want to use and click Open.
2.   Navigate to Project Window > Shortcuts > Photo Shortcuts > Other.
3.   Open the *Paint Brush Image Source* composition.
4.   Drag the image you've imported in the composition.
5.   Scale the image so that it fits the entire frame.

How do I replace the picture frame photos?

1. Go to File > Import > File (Ctrl/Cmd + I),locate the images you want to use and click Open.
2. Navigate to Project Window > Shortcuts > Photo Shortcuts > Teaser Pic Frames.
3. Open the *Teaser Pic Frame Source* you want to edit.
4. Drag the desired image from the ones you've imported in the composition.
5. Scale the image so that it fits the entire frame.
6. Repeat the process for all other *Teaser Pic Frame Source* compositions.

Note: The picture frames in this scene are only meant to show detail of the photos, so some zooming will occur.

How do I replace the photos in the Neighbourhood scene?

1. Go to File > Import > File (Ctrl/Cmd + I),locate the images you want to use and click Open.
2. Navigate to Project Window > Shortcuts > Photo Shortcuts > Neighbourhood Photos.
3. Open the *Neighbourhood Photo Source* composition you want to edit.
4. Drag the desired image from the ones you've imported in the composition.
5. Scale the image so that it fits the entire frame.
6. Repeat the process for all other *Neighbourhood Photo Source* compositions.

How do I replace the photos in the Schools scene?

1. Go to File > Import > File (Ctrl/Cmd + I), locate the images you want to use and click Open.
2. Navigate to Project Window > Shortcuts > Photo Shortcuts > School Photos.
3. Open the *School Photo Source* composition you want to edit.
4. Drag the desired image from the ones you've imported in the composition.
5. Scale the image so that it fits the entire frame.
6. Repeat the process for all other *School Photo Source* compositions.

How do I edit each School's info text?

1. Open the *School* composition you want to edit (Project Window > Shortcuts > Text Shortcuts)
2. In the Timeline Window, double click on the text layer you want to edit.
3. After editing the text, hit Cmd/Ctrl + Enter to apply changes.
4. Repeat the process for all other *School* compositions.

How do I replace the packshot house photos?

1. Go to File > Import > File (Ctrl/Cmd + I), locate the images you want to use and click Open.
2. Navigate to Project Window > Shortcuts > Photo Shortcuts > Packshot House Photos.
3. Open the *Packshot Photo Source* composition you want to edit.

4. Drag the desired image from the ones you've imported in the composition.
5. Scale the image so that it fits the entire frame.
6. Repeat the process for all other *Packshot Photo Source* compositions.

How do I edit the packshot contact details?

1. Open the *Teaser Outro* composition (Project Window > Shortcuts > Text Shortcuts)
2. In the Timeline Window, double click on the text layer you want to edit.
3. After editing the text, hit Cmd/Ctrl + Enter to apply changes.
4. Repeat the process for all other texts you want to edit.

Note: You can use the Text Nulls in the same composition to reposition the contact details.

Questions regarding the Reasons version:

How do I edit the intro title texts?

1. Open the *Reasons Title* composition (Project Window > Shortcuts > Text Shortcuts)
2. In the Timeline Window, double click on the text layer you want to edit.
3. After editing the text, hit Cmd/Ctrl + Enter to apply changes.

Note: If you need to reposition a text after you've edited, make sure you select all its position keyframes first, then place your marker on the last position keyframe of that layer and drag it around.

How do I edit the reasons texts?

1. Open the *Reason* composition you want to edit (Project Window > Shortcuts > Text Shortcuts > Reason Texts)
2. In the Timeline Window, double click on the text layer you want to edit.
3. After editing the text, hit Cmd/Ctrl + Enter to apply changes.

How do I reposition or scale the large blurry numbers in Concept compositions?

1. In the Project Window, press Cmd/Ctrl + F and look for 'Concept'
2. In the search results, open the *Concept* composition you want to edit.
3. Use the two Null layers to modify the position (or the scale) of the large numbers that are surrounding the key visual.

How do I replace the picture frame photos (In the Reasons version)?

1. Go to File > Import > File (Ctrl/Cmd + I), locate the images you want to use and click Open.
2. Navigate to Project Window > Shortcuts > Photo Shortcuts > Pic Frames.
3. Open the *Pic Frame Source* you want to edit.

4. Drag the desired image from the ones you've imported in the composition.
5. Scale the image so that it fits the entire frame.
6. Repeat the process for all other *Pic Frame Source* compositions.

Note: The picture frames in this scene are only meant to show detail of the photos, so some zooming will occur.

How do I replace the photo in Concept 3B?

1. Go to File > Import > File (Ctrl/Cmd + I),locate the image you want to use and click Open.
2. Navigate to Project Window > Shortcuts > Photo Shortcuts > Other.
3. Open the *Museum Photo Source* composition.
4. Drag the image you've imported in the composition.
5. Scale the image so that it fits the entire frame.

How do I edit the packshot contact details (In the Reasons version)?

1. Open the *Reason Outro* composition (Project Window > Shortcuts > Text Shortcuts)
2. In the Timeline Window, double click on the text layer you want to edit.
3. After editing the text, hit Cmd/Ctrl + Enter to apply changes.
4. Repeat the process for all other texts you want to edit.

Note: You can use the Text Nulls in the same composition to reposition the contact details.

How do I resolve a question that isn't here?

If you have a question about Realtor that isn't listed in this documentation, send us an email at hello@kainxtheory.com, or a message through our Videohive profile. We'll do our best to help you out.
