

Thank you for purchasing Sonata.

You're one step closer to your next great project. If you get lost between layers and keyframes, drop me a line at hello@kainxtheory.com. I'll do my best to help you.

Don't forget to write a short testimonial on your experience with Signature, and follow me on Videohive so you never miss new exciting items.

How do I replace the logo?

1. Open the Logo Source composition
2. Go to File > Import > File (Ctrl/Cmd + I), locate the file you want to import and click Open.
3. Drag the file from the Project Panel to the Logo Source composition.!
4. Scale the new layer so that it's approximately the size of the Kain X Theory logo.
5. Hide the Kain X Theory logo.

How do I replace the slogan?

1. Open the Slogan Source composition.
2. Double click on the text layer.
3. After editing the text, hit Cmd/Ctrl + Enter to apply changes.

How do I change the primary color?

1. Open the *Main* composition
2. Select the *Sonata Settings* layer
3. In the Effects Panel, change the Primary color according to your taste.

How do I change the overall color correction?

1. Open the *Main* composition.
2. Select the Color Correction layer
3. In the Effects Panel, modify the values of Color Balance according to your taste.

How do I change the position of the slogan?

1. Open the *Main* composition.
2. Select the Slogan Position layer.
3. Press V on your keyboard, then move the controller around.

The slogan gets cut off at the end. How do I fix this?

1. Open the *Main* composition.
2. Select the Slogan Mask layer
3. Set the Current Time Indicator on the layer's marker (at 0:00:07:09)
4. Press U to reveal the layer's animated properties
5. Place your mouse over the X position value (-510.8 by default) and drag left or right until the mask has revealed the entire slogan

How do I resolve a question that isn't here?

If you have a question about Signature that isn't listed in this documentation or some of the instructions are unclear, send me an email at hello@kainxtheory.com or a message through my [Videohive](#) profile.
